

Matala[®]
" Make water alive "

DIFFUSER BASE

FEATURES AND BENEFITS:

Matala offers a membrane air diffuser assembly that features a hollow base that can be filled with sand or gravel. This eliminates the need for bricks and straps to get the diffuser to sink. Available in both a single head or dual head assemblies. Single head handles airflow from 1.4-4.2cfm, double head handles airflow from 2.8-8.4cfm. 3/4" NPT threaded outlet located in the base of each diffuser.
